Showing 1–6 of 50,000 orders · Virtualized table

Keyboard: ↑ / ↓ move rows · Enter opens details · Space selects

Focus states should be visible on every input, button and selectable row.

Filter builder

Conditions inside a group use OR. Separate groups are combined with AND.

GROUP 1 **OR logic** Remove group

Status ▾ | equals ▾ | Delivered ▾ ×

OR

Status ▾ | equals ▾ | Pending ▾ ×

+ Add OR condition

AND

GROUP 2 **OR logic** Remove group

Amount ▾ | greater than ▾ | 5000 ×

+ Add OR condition

+ Add condition + Add filter group

Field examples

Status · Region · Channel · Priority · Product · Amount · Order Date · Payment Method

Operators change with the field:

Text/select: equals, does not equal, contains Numeric: equals, greater than, less than, between

Date: before, after, between Empty values: is empty, is not empty

Implementation note: update the matching count after applying changes; keep Clear all available.

ACTIVE FILTERS

Status: Cancelled ×

Amount > ₹50,000 ×

Clear all

No orders match your filters

Try adjusting your conditions or clear all filters.

Clear all filters

Your search and filter settings will be preserved until cleared.

Empty state keeps the table context visible and offers a direct recovery action.

Interaction notes

Implementation behaviors and narrow-screen adaptation

SEARCH

Search order ID, customer, email and product. Debounce input; show clear (×) affordance.

FILTER LOGIC

OR within a group; AND between groups. Keep active filter chips removable individually.

SORTING

Click a header to sort. Show one active direction indicator; Order Date ↓ in this example.

SELECTION

Header checkbox selects visible rows. Preserve selection across virtualized rows; show count.

KEYBOARD

↑ / ↓ move row focus · Enter opens details · Space toggles selection · Esc closes panel.

EXPORT

Export selected when selection exists; otherwise export current filtered result set. Confirm large exports.

FOCUS & FEEDBACK

Visible focus ring on inputs, buttons, checkboxes and rows. Use subtle hover and selected states.

VIRTUALIZATION

Fixed-height scroll container; keep header aligned with body and avoid layout shift while scrolling.

NARROW SCREEN (REFERENCE)

Orders Explorer

Search orders…

Filters · 2 active | Export CSV

Table scrolls horizontally; details use full-screen sheet.

Responsive rules

- Stack search and actions vertically; keep touch targets comfortably sized.
- Collapse filter builder behind a Filters control; show active count and removable chips.
- Keep the table horizontally scrollable; don't compress email/product into unreadable columns.
- Open order details as a full-height sheet on narrow screens; keep Close and Esc behavior.
